The Reliance Series

All Mountain Performance

/rɪˈlɪəns/ - dependence on or trust in someone or something

The all-new Reliance Series delivers paradigm-shifting performance with a five-ski line up of directional all-mountain shredders. Resort-focused skiers who demand powerful edge grip and stability when the throttle is pinned can choose the perfect chassis for their home mountain. With construction focused on lightweight durability, Reliance Series skis feature a lively character and forgiving ride that will stand up to the day-in, day-out charging no matter what the mountain throws your way.

EST POWDER ROCKER

Rocker tip and tail combined with flat camber underfoot provides the ultimate in smooth, pivotable powder turning with unmatched float.

EST FREERIDE ROCKER

Fore body rocker and extra tip-taper combine to create EST for optimized float in the soft stuff. Positive camber under foot with no tail rocker ensures these skis stay on rails when carving is the priority.

EST ALL MTN ROCKER

Rocker is paired with tapered sidecuts both tip and tail provide flotation in soft snow as well as forgiveness in turn shape. Camber underfoot maintains edge-hold on the hard pack.

AR NOSE ROCKER

A Traditional sidecut is paired with tip rocker and standard camber for easier turn initiation without compromising edge hold.

AR FREESTYLE ROCKER

Rocker tips and tails are combined with positive camber under foot to allow the ski to charge with ease through unpredictable snow and maintain a solid carve when asked to do so. Turn the whole mountain into your playground.

POSITIVE CAMBER

Traditional camber engages the tip and tail of the ski throughout the turn shape, enhancing ease of entry into, and exiting the turn, for the ultimate in a solid edge hold.

CARUBA CORE

Our lightest wood species creates the best up-hill feel while retaining the power and dampness required in descending the gnarliest of terrain. This core makes no concessions in performance in its quest to be ultra-light.

HYBRID CARUBA CORE

A combination of lightweight woods and full-length hardwood stringers, the Hybrid Caruba core creates the ultimate in weight savings, agility and maneuverability without sacrificing security or dampness.

POPLAR ASH CORE

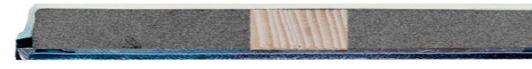

Lightweight Poplar is combined with higher density full-length Ash stringers to create an impossibly lively ski that has all the power needed for boosting to new elevations.

POPLAR CORE

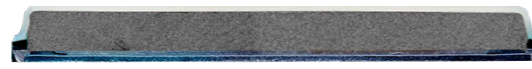

Stability, power and ease are paramount in this 100% Poplar wood core. For those looking for predictability and smoothness the Poplar core delivers in all snow conditions.

HYBRID CORE

Wood + Injectzone add performance and dampening to an affordable product.

INJECTZONE CORE

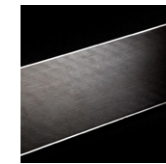

Consistency is king with this composite injection core, guaranteeing every ski is identical to the next with feel and performance.

SMEAR TECH

A 3D Beveled base in the tip and tail creates a unique feel in all snow conditions. Less likely to catch in crud, self-centering in deep snow and un-catchable on take-offs, Smear Tech lets you float effortlessly whether sliding forwards, backwards, left or right.

COMP BASE

Sintered UHMW polyethylene with added carbon aids in speed and durability on snow.

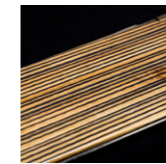

TITANAL

This blend of Zinc Aluminum acts as the shock absorber inside the ski, quieting bumps and chatter to give unparalleled stability and confidence at all speeds. When a little extra weight is acceptable we apply 2 full length, full width sheets of Titanal.

LAMINATE MATRIX

A directional layering of fiberglass dictates the flex pattern and torsional rigidity of the ski to create the ultimate lively and forgiving feel with quick response.

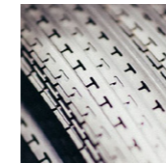

CARBON STRINGERS

Used either full length or in specific locations, specially placed Carbon Stringers add pop and stiffness without adding weight.

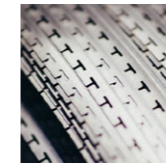

1.7 LIGHTWEIGHT EDGE

Light and strong, these heat-treated edges affect the feel of the ski minimally to ensure a snappy, lightweight feel.

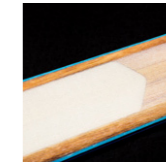

2.1 ALL-MOUNTAIN EDGE

Heat treated and built to avoid excess weight while maintaining durability, this edge gives the best balance of durability and feel of our whole collection.

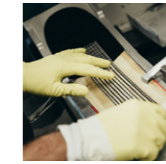

2.5 IMPACT EDGE

Oversized and specially heat treated, this edge is built to resist impact damage in the most demanding situations.

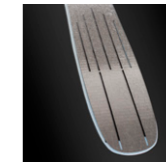

TI BINDING DAMPENER

Below the binding, a sandwich of rubber, Titanal and finally more rubber work to dampen vibration that otherwise chatters into your boots and shortens your day. Ski bell-to-bell with extra damping provided.

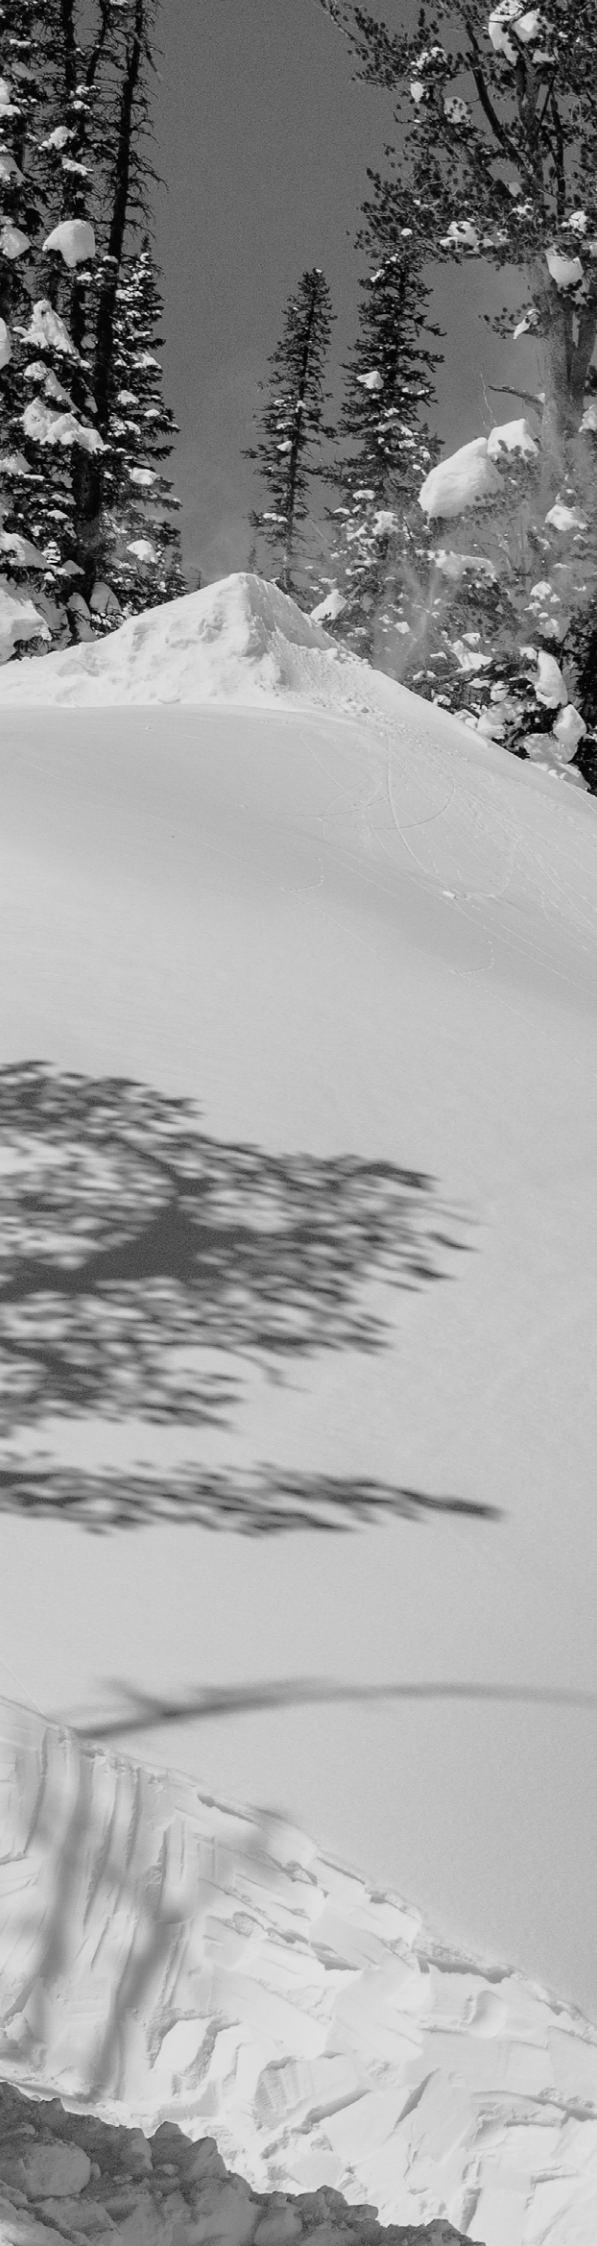

CK STRUTS

Carbon and Kevlar stringers used in the tip and/or tail to add pop and extend life.

ATB - ARTICULATED TITANAL BANDING

Titanal - A Titanal layer adds horsepower to the ski with uncompromising performance.
Elastic Compound Layer - This layer allows the ski to enter a turn with ease while compressing and releasing even more energy out of the turn than a traditional Ti layer.

ARMADA

SKI COLLECTION

Armada was born from the inspiration of athletes who redefined what skiing would become. The driving principle behind our first skis has never faded and continues to drive the innovation and development of our skis today. Skiers keep pushing the envelope of performance, so we'll keep building the skis that let them turn their creative vision into reality.

ARMADA

LOCATOR SERIES

There's an all-new archetype for touring skis built around downhill performance. The Locator Series is designed for adventures beyond the ropes where untouched powder and steep lines await. Combining phenomenal performance characteristics with super light weights, the four skis in this collection are the ultimate tools explore the mountains anywhere your legs, lungs and willpower can take you. Locator Series skis are balanced to excel on the up and the down in the enormous range of conditions found in the backcountry with float, stability and versatility at weights that won't sap the energy needed to charge the descents. It's okay to draw outside the lines. There are no limits to where we can go.

LOCATOR 112

RA0000464+

CONSTRUCTION

- EST FREERIDE ROCKER
- CARUBA CORE
- 1.7 LIGHTWEIGHT EDGE
- COMP SERIES BASE
- TI BINDING DAMPENER
- CARBON REINFORCEMENT
- AR Bat Tail Self Center Tail Clip Design

The big-mountain powder ski for hard-charging, human-powered adventures.

When deep powder is in the forecast and big terrain is on the menu, reach for the Locator 112. With a modern shape optimized for huge float and high speeds thanks to a longer radius and lower profile camber and rocker, the big dog of the Locator Series is primed for those dream days when everything lines up. A touring-focused design with a lightweight construction means even though the 112 devours descents it's efficient on the uptrack and serves up no-nonsense performance for when the backcountry demands your ultimate attention. That's a good thing because chances are you're going to want to take another lap.

- CARUBA CORE
- 1.7 LIGHTWEIGHT EDGE
- COMP SERIES BASE
- TI BINDING DAMPENER
- CARBON REINFORCEMENT
- AR Bat Tail Self Center Tail Clip Design

The everyday, every condition backcountry freeride ski.

The perfect backcountry partner is someone who is up for anything and will never let you down whether the conditions are all time, apocalyptic or something in between. Sounds a lot like the Locator 104. Multi-day hut trip in your future? The lightweight construction will keep you going on the skin track. Blower pow in the sidecountry? Ample rocker and a blended tail shape let you point it down the fall line or throw it sideways in bottomless snow on demand. When you need one ski with a soft snow focus that can do it all with predictable performance, the Locator 104 is ready.

- CONSTRUCTION**
- EST FREERIDE ROCKER
 - CARUBA CORE
 - 1.7 LIGHTWEIGHT EDGE
 - COMP SERIES BASE
 - TI BINDING DAMPENER
 - CARBON REINFORCEMENT
 - AR Bat Tail Self Center Tail Clip Design

The lightweight and versatile touring ski for charging demanding descents.

The biggest descents ask a lot from your equipment. You'll need tenacious edge hold and dependable stability for billy goating through no-fall zones while maintaining enough float to surf high-speed turns through creamy pow and perfect corn. The Locator 96 covers all these bases, which is no small feat. The 96 mm waist quickly gets up on edge and bites hard on even the iciest sidehills, all at a weight that's low enough for the biggest objectives on your tick list. The progressive shape and blended rocker lines make the 96 a versatile, confident performer in a variety of conditions from meadow skipping in hero snow to traversing refrozen sastrugi in the high peaks.

- CONSTRUCTION**
- EST ALL MTN ROCKER
 - CARUBA CORE
 - 1.7 LIGHTWEIGHT EDGE
 - COMP SERIES BASE
 - TI BINDING DAMPENER
 - AR Bat Tail Self Center Tail Clip Design

The ultralight backcountry scalpel designed for the biggest objectives.

The Locator 88 is the ultralight, precision backcountry tool primed to take you farther, faster. Set those FKTs on the uphill comfortable with the knowledge you'll be rewarded on the descents with a powerful performance to get down in style. Despite the lightest construction of any Armada ski, the Locator 88 is a confident, versatile descender with dogged edge hold when you need it most and enough rocker to keep you on top of the soft stuff. The 88 is light done right because we're only going up so we can get down.

SPECS

ZERO SERIES

Reject the status quo. The Zero Series is inspired by the groundbreaking creativity of Armada's athletes and engineers, pushing innovation further and redefining the limits of how skis are supposed to perform. Each Zero Series ski is designed to exacting standards, combining pioneering shapes with advanced materials. This collection embodies our commitment to challenging expectations by equipping skiers with the tools to take the sport into unexplored territory from remote peaks to urban handrails, infusing imagination into every aspect of skiing. Extract the uncommon from the ordinary and refuse to settle. This is Zero.

ARG II UL

RA0000396+

CONSTRUCTION

- EST POWDER ROCKER
- CARUBA CORE
- 2.1 ALL MOUNTAIN EDGE
- COMP SERIES BASE
- POWDER SPECIFIC RADIUS
- AR50 SIDEWALL

The ultimate powder ski for epic days in the deepest snow.

The ski that started a revolution is back and better than ever. The ARG II UL's reverse sidecut, massive 133 mm waist and full-length AR Powder Rocker retain the classic silhouette of the original ARG, while a new ultralight Caruba Core cuts weight to deliver an even more maneuverable, surfy ride. This no-compromise powder ski has unparalleled float, pivots on a dime and unleashes your creativity by picking up speed quickly and letting you make any turn shape imaginable in the deepest snow. Epic conditions deserve an epic ski.

CONSTRUCTION

- AR FREESTYLE ROCKER
- CARUBA CORE
- 1.7 LIGHTWEIGHT EDGE
- COMP SERIES BASE
- PIN TIP & TAIL
- Swivel Tech
- AR75 SIDEWALL

The ultimate freestyle powder ski for surfing the deepest days.

Sammy Carlson is one-of-a-kind, and he needs more than a single unique ski to handle all the creativity he unleashes on the hill. The Whitewalker 121 is the big brother to the original Whitewalker, designed for Sammy's full-throttle charging on the deepest days. It's the ultimate pow-crushing freestyle tool. The 121 delivers massive float to swivel, slash and stomp forwards, backwards and sideways in the most epic conditions. The ultralight core means the Whitewalker 121 is light enough for big days in the backcountry during huge storm cycles, while the stout flex with Swivel Tech 3D beveling in the pin tip and tail deliver versatility for everything from charging steeps to buttering pillows.

- SMEAR TECH
- 1.7 LIGHTWEIGHT EDGE
- LAMINATE MATRIX
- S7 BASE
- AR75 SIDEWALL

Lightweight & tour-able BC Freestyle ski.

Bringing light to new heights, the ARV 116 JJ UL floats like a butterfly and cuts like a butter knife for a definitive BC freestyle experience. The JJ UL is 25% lighter than the original JJ and has been a team favorite since its inception. With less weight through the tip and tail, the JJ UL utilizes our lightest Caruba Core to create a uniquely lightweight and smooth ride when the going gets deep. Powder hounds, this ski will move fast off the shelves. Act fast, and put this limited edition JJ on your feet.

CONSTRUCTION

- AR FREESTYLE ROCKER
- POPLAR ASH CORE
- 2.5 IMPACT EDGE
- S7 BASE
- SPRINGBOARD TAIL
- EDGELESS TIP
- AR75 SIDEWALL

Progressive ski design, merging carving with freestyle and freeride.

The goal was straightforward. Build a 15m radius ski that we can take to the groomers on an average day with friends, carve hard, trick around on, laugh and have a good time. No bottomless pow, no 80-foot booters, no racing gates. Make the most of average conditions at your local resort because piste skiing can be way fun with the right tools. 100mm under foot, featuring a straight-tapered, edgeless butterzone in the tip and a rockered Springboard Tail for endless wheelies and extra pop, the all new Stranger merges carving with freestyle and freeride attributes.

BDOG EDGELESS

RA0000474+

CONSTRUCTION

- AR FREESTYLE ROCKER
- POPLAR ASH CORE
- S7 BASE
- EDGELESS
- CIRCLE FLEX
- AR75 SIDEWALL

Edgeless jib ski to take on any urban feature.

Eliminating the steel edges from the BDOG gives Phil the confidence to slide wood, aluminum, concrete and other surfaces not made to blend well with traditional edged skis. Circle Flex utilizes our durable Poplar-Ash wood core combined with a unique fiberglass layout to give the ski the softest flexing feel on the market. AR Freestyle Rocker and signature straight sections in the sidecut provide large surface area for all imaginable butters and presses and eat up crusty, handmade in-runs with ease. Creativity is king for Phil, and the BDog Edgeless is his new favorite tool.

- 2.1 ALL MOUNTAIN EDGE
- AR100 SIDEWALL

The no holds barred charging ski for smaller-framed shredders.

We all know it's the size of the fight in the dog that matters. For too long smaller-framed shredders have been overlooked during ski development, relegated to half-baked shrunken chargers or noodly wigglers. Not anymore. The Short Pants Paradox was designed from the ground up with a 112 waist, powerful flex and long turn radius to provide high-performance big-mountain charging characteristics in a shorter length. Everyone from big mountain competition juniors to shredding women and men who don't require the surface area and float of longer lengths can enjoy a ski designed to lace 20-meter turns down the fall line at high speeds while trusting the SPP to stand up to all the punishment they can dish out.

ARV SERIES

The ARV SERIES is the funnest family in skiing. Built for the all-mountain, freestyle skier, the ARV Series packs performance and durability. From park, to sidecountry, to backcountry, the ARVs are giving skiers a step up in a step-down world.

ARV 116 JJ

RA0000402+

CONSTRUCTION

AR FREESTYLE ROCKER
POPLAR ASH CORE
SMEAR TECH
2.5 IMPACT EDGE
S7 BASE
AR75 SIDEWALL

The blueprint for any playful powder ski.

The iconic Armada ARV 116 JJ continues to carve its name into ski lore, coming correct with a Poplar-Ash wood core for maximum energy return and pop when sending it down pillow lines and ripping tree shots. The JJ's balanced flex profile is ideal for surfing powder while maintaining enough stiffness through the tip and tail to excel in tight conditions and no-fall zones. Smear Tech 3D base beveling in the tips and tails allow limitless directions of slashes, presses and butters as you put your signature on the mountain.

AR75 SIDEWALL

True one-ski-quiver, all-mountain twin.

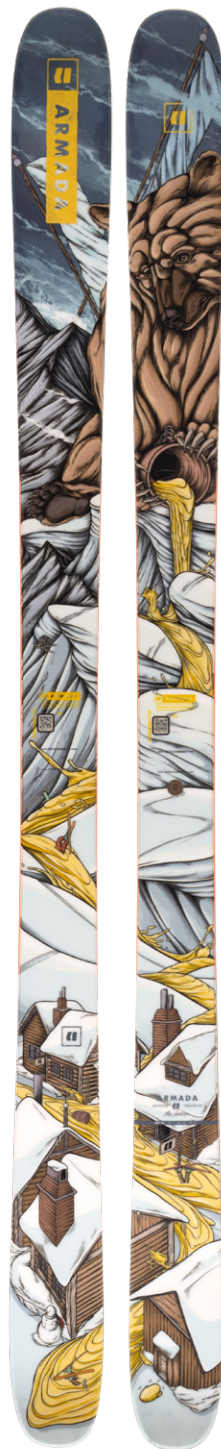

The ARV 106 has been our most versatile all-mountain freestyle ski since its inception. It brings an ultra-playful yet stable ride to high performance skiers tired of tossing sticks in the trash every half season. The ARV 106 features Smear Tech's edgeless base beveling in tip and tail, enhancing soft snow performance and adding additional release. It's reinforced with AR75 Sidewall construction and a Poplar-Ash Core to absorb high speed chatter and any rail, wall or concrete you can press them on. The ARV 106 is as at home surfing the white wave as it is thrashing the pro park.

ARW 106 UL

RA0000434+

CONSTRUCTION

- AR FREESTYLE ROCKER
- CARUBA CORE
- SMEAR TECH
- 2.5 IMPACT EDGE
- S7 BASE
- AR75 SIDEWALL

Quiver-killing, all-mountain twin.

The ARW 106 UL is the evolution of the long-sought one-ski quiver for the shredder who does a little bit of everything. An ultralight Caruba Core lowers the swingweight and keeps things light when boosting airs or hitting the bootpack to get that secret stash. The Smear Tech base's edgeless beveled tips and tails help the ski effortlessly float in powder and charge through crud without deflecting while enabling a surfy feel and catch-free butters. With sizes going up to 180 and 188, we expect plenty of your guy friends looking for versatile performance with a unique, ultralight construction to pick these up as well. Chase powder, lap the park, carve up groomers and slay the bumps. The ARW 106 UL is ready for anything.

SIGNATURE SERIES

Our signature athletes push the envelope year after year, and we believe their skis should too. Designed to the exact specifications of skiing's most creative trio, our Signature Series echoes the influence of Sammy Carlson, Henrik Harlaut and Phil Casabon, delivering professional performance from the deep stashes and pillows of British Columbia to the icy streets of Quebec and every type of terrain in between.

WHITEWALKER 116

CONSTRUCTION

- AR FREESTYLE ROCKER
- CARUBA CORE
- SMEAR TECH
- 1.7 LIGHTWEIGHT EDGE
- COMP SERIES BASE
- PIN TIP & TAIL
- AR75 SIDEWALL

Sammy's holy grail.

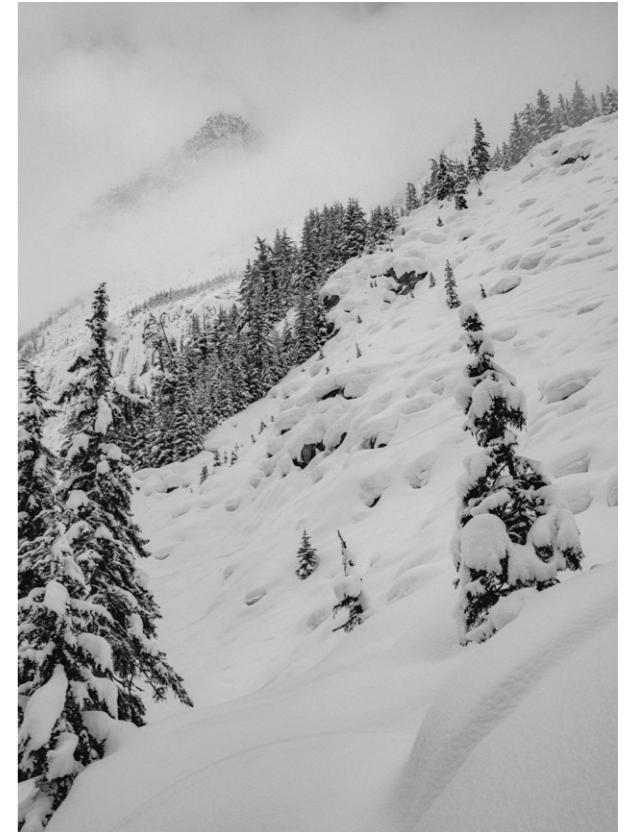

We set out to build Sammy a powder twin tip that is stable enough to charge exposed lines and take big hits with maximum confidence yet light enough for foot-powered backcountry access. A strategically enhanced Caruba Core allows these concepts to merge while the rockered Pin Tip and Tail guarantee quick turn initiation, reduce drag and further lower the swingweight. Lightweight and stable, but offering plenty of release when needed, the Whitewalker perfectly compliments Sammy's laid-back, surf-inspired style that's peppered with sudden bursts of all-out aggression.

DECLIVITY SERIES

Modern resort-based skiing demands high-speed stability and nimble maneuverability along with tenacious edge hold and effortless float in equal measure. With six models tuned to meet the rigors of any mountain, the Declivity Series redefines all-mountain performance. This versatile collection is designed to handle changing conditions from untouched hero snow to refrozen moguls and everything in between, all season long.

DECLIVITY X

RA0000420+

CONSTRUCTION

EST FREERIDE ROCKER
HYBRID CARUBA CORE
2.1 ALL MOUNTAIN EDGE
COMP SERIES BASE
AR100 SIDEWALL

Uncompromising, directional big-mountain charger with modern attributes

When you think big mountain, you think Chamonix. We designed the Declivity X in collaboration with Cham local, Tof Henry, for going fast in the most demanding conditions. Tof is known for bringing a freeride approach to faces that used to be off limits for anything but jumps turns. He needed strong, stable and damp skis he can rely on no matter what. The AR100 Sidewall and directional, slightly rockered tail offer maximum control and stability, while the AR Freeride Rocker and Hybrid Caruba Core ensure the nimble maneuverability needed to access exposed, technical terrain and add versatility for when the conditions turn on. The Declivity X delivers unequalled stability and confidence when it gets steep and deep.

Directional all-mountain ski, designed for full-throttle resort charging.

The Declivity 108 Ti is a workhorse all-mountain resort ski. The Comp Series Base and bombproof 2.1 All Mountain Edge provide the durability to handle the day-in, day-out abuse modern shredders dole out all season long. Design cues inspired by the flagship Declivity X like the tapered tip lines and fully-cambered tail of the EST Freeride Rocker hint at the heavy-hitting ambitions of the 108 Ti, while a lightweight Caruba Core and moderate turn radius help you finesse the skis through tight spots and variable conditions with ease. Whether the terrain calls for opening it up or threading the needle, the Declivity 108 Ti is your ride.

High-performance, directional all-mountain ski rooted in Armada DNA.

With the hard-charging all-mountain skier in mind, the Declivity 102 Ti took the full-throttle thought process of the Declivity X and applied it to a versatile chassis, specifically built for mixed conditions. A full AR100 Sidewall, Articulated Titanal Banding, a light-weight Caruba Core and triaxial glass produce a ski that is incredibly powerful and perfectly damp but doesn't carry excess weight. A fine-tuned flex profile and a modernized shape create a performance driven all-mountain ski with no speed limit attached.

- 2.1 ALL MOUNTAIN EDGE
- COMP SERIES BASE
- ATB - ARTICULATED TITANAL BANDING
- AR100 SIDEWALL

Modern all-mountain ski with serious frontside ambitions.

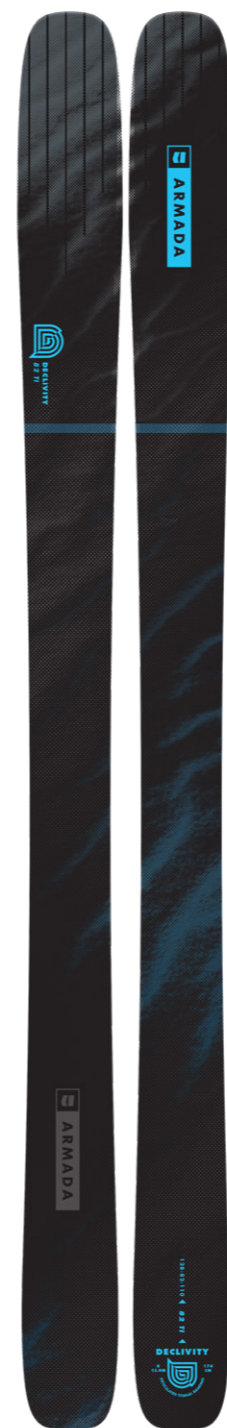

Built off a platform that excels in any condition, the Declivity 92 Ti screams versatility from ripping high-speed groomers to charging chopped-up powder. A full AR100 Sidewall partnered with our Articulated Titanal Banding provides confident grip on hardpack and allows power to build in a smooth yet predictable way. Pairing light-weight Caruba with a triaxial glass lay-up, we created a high-performance ski that doesn't carry extra weight. No matter what the mountain throws at you, from turning and burning on hardpack to sliding down silky pow, this one-ski-quiver will conquer anything on the hill.

EST ALL MTN ROCKER
CARUBA CORE
2.1 ALL MOUNTAIN EDGE
COMP SERIES BASE
ATB - ARTICULATED TITANAL BANDING
AR100 SIDEWALL

Frontside weapon that dices groomers and puts its pilot on rails.

The Reliance 82 Ti is purpose-built for laying trenches down the fall line and letting gravity do the work. Articulated Titanal Banding throughout the ski dampens vibrations, adding an extra layer of stability and confidence when the edge angles get high and hips get perilously close to the snow's surface. The narrower 82 mm waist transitions quickly from one turn to the next, and the tighter radius sidecut helps carve perfect shapes with minimal input. The Reliance 82 Ti grips like a vice and rebounds from turns with the energy to transform groomers into your own personal roller coaster.

BINDINGS

N SHIFT MNC 13

RD0000024+

DESCRIPTION

The Armada Shift MNC 13 bridges the gap between low tech pin bindings and traditional alpine bindings. It offers skiers the efficient performance of a pin binding when touring uphill, and the safety of a traditional alpine binding when descending.

DETAILS

DIN Range: 6-13
Brake Width: SH90 | SH100 | SH110 | SH120
Screw Length: Senior Norm
Adjustment Range: 30mm
Weight: 1730g

FEATURES

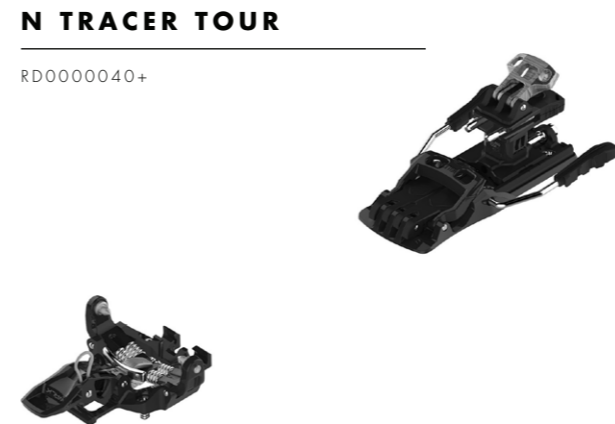

Multi Norm Compatible
 Toe Height Adjustment
 Low Profile Chassis
 Oversized Platform
 Hike and Ride Switch
 Crampon Compatible
 Freeski Brakes

COMPATIBILITY

Alpine boots compliant with ISO 5355
 Touring boots compliant with ISO 9523 Standard
 Ski Boots equipped with WTR Technology pads or with gripwalk pads

N TRACER TOUR

RD0000040+

DESCRIPTION

The Tracer Tour is our lightweight tech binding that's a perfect match for the Tracer/Trace Series skis when saving weight is your ultimate priority. Combining durability with ease of use, it features a patented step-in aid at the front, as well as two climbing aids in the back working separately from the heel tower and allowing for 0°, 7° and 13° positions. A broad 40mm mounting profile guarantees maximum power transmission and screw retention on wide skis.

DETAILS

Brake Width: G90 | G100 | G110 | G120
Climbing Positions: 2 | 7 | 13
Adjustment Range: 50mm
Weight: 780g

FEATURES

Step-In Aid
 Wide Screw Implementation
 Lightweight Construction

N STH2 MNC 16

RD0000052+

DESCRIPTION

A longtime staple in freeride and freestyle skiing, with the highest DIN value Armada offers, the Armada STH2 MNC 16 gives you complete confidence to perform at your best.

DETAILS

DIN Range: 7-16
Brake Width: C90 | C100 | C115 | C130
Screw Length: Senior Norm
Adjustment Range: 28mm
Weight: 2480g

FEATURES

Multi Norm Compatible
 Toe Height Adjustment
 Low Profile Chassis
 3D Driver Toe
 Dual Transfer Pad
 Freeski Brakes

COMPATIBILITY

Alpine boots compliant with ISO 5355
 Ski boots equipped with "Grip Walk" or touring soles

N SHIFT MNC 10

RD0000038+

DESCRIPTION

The Armada Shift MNC 10 bridges the gap between low tech pin bindings and traditional alpine bindings. It offers skiers the efficient performance of a pin binding when touring uphill, and the safety of a traditional alpine binding when descending.

DETAILS
